

The Southeastern Pennsylvania Transportation Authority (SEPTA) is the nation's sixth largest transportation system with a vast network of commuter rail, subway/elevated, trackless trolley, light rail, and bus routes serving a 2,200 square mile service region composed of Philadelphia, Bucks, Chester, Delaware and Montgomery counties. What's more impressive is our inclusion on the 2015 Forbes Magazine list of America's Best Employers. Ranked the 33rd best company to work for in America signals a new direction to become a driving force for the economic success of the region and a great place for your career.

Due to an internal promotion we are currently seeking a Manager of Engineering (Structural) who will be responsible for all structural related engineering issues in our Facilities Engineering Department (bridges, etc.). Based in our Center City Philadelphia headquarters, this is a key role requiring excellent interpersonal skills with the following specific responsibilities:

Requirements include:

- Bachelor of Science Degree in Engineering (Structural/Civil) and eight (8) years of responsible related Civil/(Structural) engineering experience required. Prior Supervisory or lead experience preferred.
- Bridge design experience is strongly preferred.
- Professional Engineering Certification (PE) required.
- Strong understanding of CAD.
- Must be proficient in the latest versions of the following programs; AutoCAD, Microsoft Office Suite, and Microsoft Project.
- Excellent written and verbal communication skills.

Working for SEPTA provides you with a superior benefits package including medical, dental, prescription, life insurance, pension, and retirement plans, and free transportation for SEPTA employees on all SEPTA modes.

Please apply online at: www.SEPTA.org/Careers/Engineering Manager (Structural)

SEPTA is an Equal Opportunity Employer committed to diversity.
