

The Philadelphia Engineer

Founding Chapter 1934 – December 2013

PRESIDENT'S MESSAGE

We've had a good start to the fall season of our 2013/2014 year. September was a busy month and we kicked it off with a tour (and tasting) at local Philadelphia landmark Yards Brewery. The tour was interesting and covered various technical and nontechnical aspects of the process and sustainable business model. The tour guide fielded some good questions from our group of beer newbies and veterans alike. The PSPE 2013 State Conference was also held in September where the Philadelphia chapter was well represented and accepted the Special Projects Award at the Installation and Awards Banquet. We try to lead by example and let our events and programs reflect our mission and goals. This latest award was earned through our collaboration with CBS3 last May on what could turn out to be an important annual STEM event. The last two months have continued our tradition of providing interesting speakers on various topics at our dinner meetings. The monthly meetings are a great way to earn PDH credits while networking and socializing with other professionals. Our December meeting is a regional event that includes the yearly Outstanding Engineering Achievement Presentations and I'll look forward to seeing you there

Justin Alexander, PE
