Vapor Intrusion Mitigation

(Volatile organic compounds in Commercial Construction)

Presented by

James P. Cinelli, PE, PG, BCEE

President – Liberty Environmental, Inc.

Reading, PA.

Jim Cinelli has been President of Liberty Environmental for over 2 decades and is licensed in multiple states (including New York). Jim will be presenting a very comprehensive and practical course to address volatile organic compound mitigation in Commercial Construction. The cource will include data collection, site assessment & characterization, design approach and influencers (standards, materials of construction, air movers, alarming, vapor barriers – types and installation considerations, and capture zones). This provided a great opportunity to gain solid insight and design tools to address a "real" problem with vapor intrusion.

The Pennsylvania Society of Professional Engineers, through PIE, has evaluated and approved this "course/activity" as meeting the continuing education license requirements for 1.0 Professional Development Hours in New York State. PSPE confirms the "course/activity" will be accepted for credit in PA, & NJ - perhaps other National Model states where courses do not require pre-approval.

Price using PayPal - $10.00
