Course, Presentation, and Networking

Wednesday, September 4, 2024

Virtual ZOOM Course: 6:00 PM to 8:00 PM

An Overview of the Philadelphia Zoning
Process for Engineers

Presented by

Meredith L. Ferleger, Esq., Dilworth Paxson, LLP

Securing entitlements for a project in Philadelphia requires interaction with a variety of stakeholders throughout the process, including pre-requisite review agencies, permitting departments, City Council members, and local communities. Project Engineers are frequently called on to provide critical support to the project team, which may include the developer, architects, attorneys and other consultants with the common goal to see the project to fruition. If a variance is required, the Engineering team is relied upon to provide crucial information on the project's impacts concerning noise, traffic, environmental issues, and other "non-zoning" related aspects of the project that are important to address while working with numerous stakeholders throughout the process. Join Meredith L. Ferleger, Esq. of Dilworth Paxson LLP on September 4th for a discussion surrounding the Philadelphia zoning process and learn of how the engineering team may assist to shepherd the project from the first filing to the issuance of a Zoning Permit. Click to reserve FREE to join and view, \$5 for PDH.

PSPE believes the "course" will be accepted for credit in PA, NJ, and other National Model states where courses do not require pre-approval.

This course has not been certified for credit in the State of NY
